

Shunpike Road Sidewalk Project – Noe Avenue to Pine Street

PROJECT UPDATE
10/7/14

Please note that the Township will be undertaking a sidewalk project on the eastbound side of Shunpike Road between Noe Avenue and Pine Street. The project is tentatively scheduled to begin in late October. The road will remain open at all times; however, only one lane will be open for traffic flow through the work zone. As such, traffic delays due to temporary stoppages should be expected in both directions during the construction period (anticipated to last for three to four weeks). Motorists/bicyclists should proceed with caution through the project work zone, and be attentive to traffic control measures and/or traffic directors stationed in the area. Planning an alternate route around the construction area is highly recommended.

Please continue to consult the Township website for future project updates. Thanks for your patience and cooperation!
